Work Experience

Full Stack Developer

M/s. Elgi Equipment Ltd-Coimbatore, Tamil Nadu

Internship

May 2024 to July 2024 • Internship

Internship Experience at Elgi Equipments Private Limited

During my 3-month internship at Elgi Equipment's Private Limited, I had the opportunity to work on five diverse projects under the Agile Scrum methodology. This experience sharpened my technical and collaborative skills, as I contributed to various stages of software development, from requirement analysis to implementation and testing. I also took on the role of Scrum Master for one month, where I facilitated daily stand-ups, sprint planning, and ensured team alignment with sprint goals. One of the key highlights was contributing to a U.S.-based application development project, which gave me practical exposure to real-world client requirements and cross-functional teamwork.
